Bengaluru, India

SUMMARY

Software Developer with 4.5+ years of experience in designing stunning UI and building robust backend solutions. Passionate about solving complex problems with simple, scalable solutions in an ever-evolving tech landscape.

EXPERIENCE

- **Canalys**  Jan 2022 - Current
Bengaluru, India

Software Engineer [Javascript, ReactJs, Node, ExpressJs, MySQL, AWS]

 - Developed dynamic social media newsfeed, increasing community engagement by 35% over 6 months through content aggregation from internal sources.
 - Implemented a gamified survey engine, boosting survey participation by 63% with a point-based incentive system.
 - Shipped vendor benchmarking tool, automating data collection and providing insights for 50+ global vendors.
 - Led UI design of public websites. Built responsive mobile first website, enhancing the user experience.
 - Optimized CRM by improved customer targeting on interests, enhancing marketing precision and engagement.
 - Streamlined Data Solutions for Analysts by automating complex data processes replacing legacy excel workflows.
- **Cognizant** Sept 2021 - Dec 2021
Remote

Programmer Analyst Trainee [Java, MySQL, ReactJs]

 - Worked on a feature to identify service bottlenecks and reduce ticket resolution time in service dashboard.
 - Enhanced the service management dashboard with UI updates, ensuring a smoother UI experience.
- **Cognizant** Feb 2021 - Aug 2021
Remote

Intern [Java, MySQL, HTML5, CSS3]

 - Developed and presented a internal marketplace application using Java and Springboot as a part of final project.
- **Cetpa Infotech** May 2019 - July 2019
Dehradun

Intern [Java]

 - Completed intensive development training in Java focussing on building scalable mobile applications. Developed multiple applications including weather app and flappy bird clone using Java's libGDX library.

SKILLS

- **Programming Languages:** java, javascript
- **Web Technologies:** HTML5, CSS3, Bootstrap, Tailwind, ReactJs, NodeJs, Express
- **Database Systems:** MongoDb, Mongoose, MySQL, Postgres, Prisma
- **Other Tools and Technologies:** AWS S3, Codebuild, Lambda, Git, Github, UI/UX design, Figma

ACHIEVEMENTS AND HIGHLIGHTS

- Attended Channel Forums in Singapore (2022) and Thailand (2023). The event, attended by over 1,000 participants, featured tech giants like Lenovo and HP.
- Consistently ranked among top 3 in a batch of 250 during training program in Cognizant. Selected as team lead post training to deliver final project as part of internship.
- Started up Bitsgreet (E-commerce platform for Cakes Flowers) and got into DIT University Startup Incubation. Got hands on experience in UI/UX design, AWS infrastructure and business management.

EDUCATION

- **DIT University** Aug 2017 - May 2021
Dehradun, India

Bachelor of Technology - Computer Science

 - GPA: 8.03/10

PERSONAL PROJECTS

- HighlightHero – Library designed to highlight code in Markdown content to enhance the presentation and functionality of code snippets in your blogs, documentation, and more.
- sudoCode – A academic exercise to build my own Collaborative Coding Platform, with own programming language, shell, real-time protocol and KV store
